Building Space For Business Since 1981 • Spring 2016

## ***Pizza Factory Is Now Open In Gresham!***

*This 3,535-square-foot tenant improvement is home to the first Pizza Factory franchise in Oregon. Rated Top 10 in the nation, it is located in the Gresham Station at 1088 NW Civic Drive, Gresham, Oregon.*

*“We Toss’Em, They’re Awesome!”*

## Continuous Improvements In Constructing Excellence

**W**hether it is the processes we use for greater efficiency in operating our business, on-going jobsite safety training, updating equipment, learning new computer systems, or our own personal development, Joseph Hughes Construction is in a continuous state of improvement.

We recognize the importance of innovation and the need to foster a culture of continuous improvement. We have recently updated our construction software to more effectively manage the entire lifecycle of our projects, and have hired additional teammates due to the increase in volume of upcoming projects and the health of the economy. These are just a few examples of what we’re doing to enhance the quality we bring to our clients and our community...*and that is our promise!*

# Kids' Robotics Competition Is A Learning Opportunity

**A** demolition and renovation of the former Laika Entertainment Studios facility was recently used to teach a team of middle school students and aspiring robotic engineers about dealing with construction waste.

Caleb Beaudin, JHC Senior Project Manager and father of team member Nico, offered the use of the JHC jobsite located at Northwest 22nd Avenue and Pettygrove Street. The building is being repurposed as creative office space for client Kensington

Investments.

The student team is one of thousands of students across the country participating in the LEGO league competition, developing projects for the future use of robotics. The demolition debris had been separated into various piles such as wood, metals, drywall etc.

The students brainstormed for many hours and ultimately decided to focus on the re-use and re-purposing of the mountain of pink fiber glass insulation. The team decided to robotically mix the fiberglass with epoxy, which creates a solid that can be shaped using molds. They will use it to design cars and trucks.

*Left: Caleb Beaudin, JHC Senior Project Manager, explains how materials are recycled and repurposed while leading a tour of a demolition site.*

## What's Happening at JHC?
